DIS STUDENTS ALL WIN MEDALS AT AMEC IN SINGAPORE

A wonderful achievement by 19 students from Dewey International School! The children represented our school and our country for 5 days at the AMEC competition in Singapore which was all about electricity and coding. Dewey is so proud that every single student was awarded not 1 but 2 medals! In preparation for their success our students received specialized training in the basics of electronics and robotics at Elite school. Dewey organized all of the details for the 5 days of travel and competing, and students were well looked after and cared for by our staff and a representative from the Singapore team.

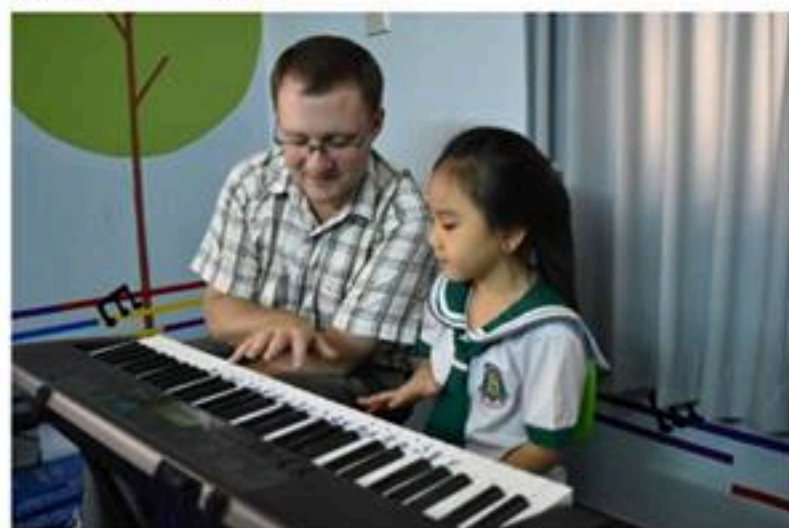

As well as competing in problem solving activities the students enjoyed participating in ice-breakers and group activities. In Singapore they worked in teams to solve problems during workshops regarding Robotics, VR (3D glasses), Drones, and Smart Household Application.

MUSIC AT DCH

At DCH we recognise that music is a natural and important part of young children's growth and development. We know that early interaction with music positively affects the quality of all children's lives. Successful experiences in music help all children bond emotionally and intellectually with others through creative expression in song, rhythmic movement, and listening experiences. Music in early childhood creates a foundation upon which future music learning is built. We believe that all children have musical potential and that every child can have successful, meaningful interactions with music. We allow development of this potential, through numerous encounters with a wide variety of music. Also, we believe abundant opportunities to participate regularly in developmentally appropriate music activities are important for every young child.

Our music education for young children involves a developmentally appropriate program of singing, moving, listening, creating, playing instruments, and responding to visual and verbal representations of sound. Our Music teachers are committed to providing exemplary music experiences for young children.

DEWEY INTERNATIONAL SCHOOL PARTICIPATING IN GLOBAL NATURAL HISTORY DAY 2018

Global Natural History Day (GNHD) is an international organization with the aim of helping students to understand science and history through research. It has hosted conferences and competitions for students in the past regarding studies in natural sciences, anthropology and history.

This year, Dewey International School - American Curriculum is proud to say, we have six (6) groups that were qualified to compete in Wuhan of Hebei Province, People's Republic of China from the 18th of July to the 27th of July, 2018. For the past months our students were diligently researching and studying their topics in preparation for the competition that takes the forms of either performance or presentation under the evaluation of the board of judges.

GNHD Cambodia, the arm of GNHD international, held a qualifying competition in Phnom Penh and Battambang to identify the groups that would be sent to China to represent Cambodia.

Dewey International School had 22 participant groups, with two members each, the biggest number of participants of any school. On 8th of June 2018, GNHD Cambodia chose 6 groups of students from Dewey International School – American Curriculum as the qualifying teams to represent the school in the competition in China.

Dr. Nith Bunlay, the deputy head of Cambodia's Department of Higher Education and Research from the Ministry of Education, Youth and Sport stressed that "there are many advantages of joining GNHD, such as students are able to work in research projects, improving public speaking, building personal confidence, and possibly to become young scientists. Also, they have the opportunity to gain international experiences with pride for themselves and their school". He continued that "there is only Dewey International School that basically supports GNHD in Battambang Province".

RESEARCH PROJECT WITH WE-GOAL CONSULTANT CO, LTD

The pride of Dewey International University is based on the ability and achievement of its own students for which DIU has put a lot of effort. In this regard, we are delighted that We-Goal Consultant Co, Ltd., one of the biggest research companies, admired DIU students' job after involving in one research project on Battambang Demography from 9th to 11th June 2018. Ms. Melissa emailed us that "Thank you for sending your students to us. We will let you know the results of the survey when we meet. I'm very excited to find other ways of partnership. Please share with us your thoughts and ideas and plans for the university when we meet."

For sure, we are looking forward to having such useful activity for the sake of our students and university with We-Goal Consultant Co, Ltd.

SAIMIT VISIT

June 2018 seemed a partnership month of DIU. DIU management team gave a warm welcome visit to SAIMIT Group Delegations from Thailand On 10th June 2018. It was a fruitful visit and several things were achieved for this visit such as:

1. Meet DIU management team to discuss Signing a MOU.
2. Visit the students during learning with Recommendation.
3. Make decisions on an agreement of MOU.

During the visit, SAIMIT delegates were really impressed by the English proficiency of our students. And they welcomed a practicum project in Thailand with SAIMIT Group in the near future.

WORKSHOP WITH HIGH SCHOOL STUDENTS

On 18th June 2018, AAUR accomplished another workshop on Guidance of Skill Selection for High School Students. Two hundred students from other high schools around Battambang city were invited to the workshop. The participating students were reminded to choose the right skill with the right university. The quality, discipline, and curriculum system of a university are criteria for students to consider in selecting a university. In addition, the workshop truly brought a good relationship with the university and students.
